

A 55: New online exclusive loudspeaker from CANTON

Niederlauken, XX May 2018. **From autumn 2018 there will be an addition to CANTON's successful A family: the new A 55, offering even more volume. As the bigger and more powerful sister of the A 45 and A 35, the A 55 is perfectly designed to provide sound in larger spaces.**

High-end sound with impressive performance

The traditional high quality components of the Reference class are also present in the A 55: The ceramic oxide tweeter system and the mid-range and woofer system based on a ceramic tungsten chassis provide the foundations for a pure, clear sound. At the same time, the 400 watt music power output and 3-way downfire bass reflex system together create a full and powerful sound at all times.

Proud size with modern technology

At 27.5 cm wide, 115 cm high and 48.5 cm deep, the A 55 is almost 30% larger than the A 45. Yet it is not just the volume that impresses – the solid MDF cabinet with its minimalist design and the curved aluminium socket construction make this speaker an eye-catching feature in any living room. The seamless diamond-cut rings, also made of aluminium, add a stylish finishing touch to the elegant appearance of the A 55. The A 55 is available in matt white and high-gloss black.
