

## Reference 8 K: Slim, high-end floorstanding loudspeaker from CANTON

Weilrod, 15<sup>th</sup> of May 2018. **The award-winning Reference K family from CANTON has a new family member – the Reference 8 K with a slimmer cabinet suitable for any living room environment and the tried and tested high-end sound of the ceramic tungsten technology.**

### Highest quality – perfect for music and home cinema

The loudspeakers of the Reference K series are known for their uncompromising sound quality, which extends to the very last nuances of sound. As the smallest floorstanding loudspeaker of the Reference K series, the Reference 8 K delivers this elegant and powerful sound, but now on a narrow base to suit any living room. The 3-way downfire bass reflex system with bass guide and 300 watts music power output enables a strong bass response up to 24 Hz – for absolute music and home cinema enjoyment.

### Elegant down to the smallest detail

As well as the high resolution ceramic tweeter system and the ceramic tungsten mid-range/woofer system with double cone membrane in the bass area, the Reference 8 K is also a visual treat with its seamless diamond-cut aluminium rings. The cabinet has plenty of space for the two woofers (160 mm), the mid-range speaker (160 mm) and the tweeter (25 mm) – but with a width of 23 cm, a height of 98.5 cm and a depth of 35 cm the Reference 8 K still offers more than enough volume to fill even large spaces with confidence.

The Reference 8 K is available from selected Reference K retailers in white and black lacquer with piano finish.
