

VENTO .2 SERIES: Hifi classic from CANTON has a new look and new technology

Weilrod, 7th of August 2018. **The elegant Vento series is being updated: the high-end, elaborately crafted range is being modernised in our Version .2 with a new appearance and larger cabinet volume – a clean look on the outside and even better sound from the inside.**

High-quality finish with top sound and a great look

As well as the first-rate ceramic tweeter system and high-fidelity titanium membranes, the new Vento .2 series has plenty of appeal thanks to its modern screwless diamond-cut aluminium rings. For the low audio frequency range, the large floorstanding speakers have a double cone membrane with a continuous membrane surface. This means the Vento .2 fits perfectly into your home, both visually and acoustically.

Larger curved cabinet

A little bit extra? CANTON is giving the Vento .2 series a larger cabinet volume in a curved design with a stronger midsection – ensuring bigger and more powerful sound. There are also conical black spacers and a modern new base construction with elegant chamfered edging.

The Vento .2 series comes in a black or white high-gloss finish, and the Vento 896.2 DC and 886.2 DC are also available in “cherry”.

Vento 896.2 DC:	Floorstanding Speaker
Vento 886.2 DC:	Floorstanding Speaker
Vento 876.2:	Floorstanding Speaker
Vento 866.2:	Center Speaker
Vento 836.2:	Compact Speaker
Vento 826.2:	Compact Speaker
Vento 816.2:	OnWall Speaker
